

Xentric® Order S.W.I.F.T.

Full-service provider for installation
and operation of Xentric Order for Xetra®

Operation of Xentric Order for Xetra

As a full-service provider, Deutsche Börse Systems offers to take over the complete operation of Xentric Order for Xetra from the participant, apart from the installation of Xentric Order onto the participant's in-house system.

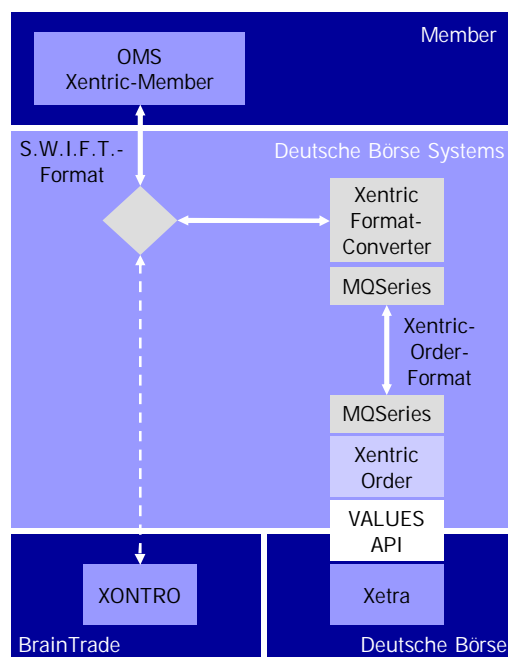

This enables the order-routing from the member's order management system (OMS) to Xetra via the existing S.W.I.F.T.-interface of XONTRO®. The conversion of the order streams between the Xentric-Order format and the S.W.I.F.T.-format is done by Deutsche Börse Systems.

Benefit of the operation of Xentric Order for Xetra by Deutsche Börse Systems.

- n Connection: Utilisation of the existing S.W.I.F.T.-interface.
- n Infrastructure: Supply and operation of the software, hardware and network infrastructure for the order-routing to Xetra.
- n Setup: Installation and configuration of the components.
- n Upgrades: Realisation of the software-upgrades for the operating system, the subsystems and Xentric.
- n Simulation: Connection to the Xetra-Simulation.
- n New Xetra-Releases: Activities because of the modifications caused by new Xetra-releases.
- n Exchanges: Available for Xetra Frankfurt and Xetra Vienna.
- n Service: Operation, support, maintenance and monitoring of the Xentric-Order systems.

No effort for operation and installation of the software for the customer!

Connection of Xentric Order via S.W.I.F.T.-interface

Xentric Order for XONTRO or Eurex

Deutsche Börse Systems offers a professional order-routing for the trading systems XONTRO and Eurex®. The operation can be effected by the member or by Deutsche Börse Systems.
