

ExServes WebTrading

The cost-efficient alternative to a MISS

Easy, safe, cost-efficient

ExServes® WebTrading offers internet-based access to Deutsche Börse Group's trading systems from any of your registered trading locations. All you need is a standard web browser. Modern encryption and authentication methods guarantee the highest degree of IT security.

Customer- and cost-driven solutions

ExServes WebTrading offers a cost-efficient solution to trading participants who only need sporadic access to the MISS infrastructure for administrative purposes, GUI-based trading and/or for emergency scenarios.

Your benefits:

- n Cost reduction: wide variety of trading and administrative functionalities at low fixed costs
- n Time-to-market: exceptionally short implementation periods both Deutsche Börse Group side and for you as trading participant
- n Applicability: no specialized VALUES-/MISS-know-how required
- n Synergies: easy to integrate as internet access is normally already available
- n Total cost of ownership: necessary software is available free of charge; no purchase, service, or renewal of MISS-Hardware required

Xetra/Eurex Sponsored Access special offer
Members with a direct leased line trading connection to Xetra® or Eurex®, that do not utilize any VALUES / MISS related channels can request to receive ExServes WebTrading for up to four workplaces free of charge.

What ExServes WebTrading offers you:

- n "Plug and Trade": no installation of trading software necessary
- n Internet bandwidth of 1 Mbit/s is sufficient for average to low trading volume
- n State-of-the-art technology
- n Standard web browser for access to trading applications (production and simulation)
- n High security level due to a two-tiered authentication procedure with token login, trading system login and a 1024 Bit connection encryption guarantees the highest possible level of security
- n Receipt of reports via the internet and SFTP/certificate (to static IP-address)
- n Location independent access from any of your registered trading locations via the internet

Further ExServes-Products can be used with ExServes WebTrading:

- n ExServes Proximity Services – lowest possible latency times due to physical proximity
- n ExServes Management Link – cost-efficient connection via the Deutsche Börse AG network
- n ExServes RSM Professional – continued, proactive monitoring and maintenance of your trading systems, including automatic troubleshooting
