>Certificate Programmes

### Training Description

This certificate programme aims at providing participants with a comprehensive understanding of securities transactions and the related system requirements.

Participants will obtain proof of their technological skills as well as an understanding of IT needs specific to the financial services area.

### Target Group

The programme has been designed for project managers and consultants specialising in exchange systems. It is also suitable for professionals with experience in the securities business who manage change processes, look after trading systems or develop interfaces. Persons who conduct product and system tests should also benefit from this programme.
