# ExServes® smart migration

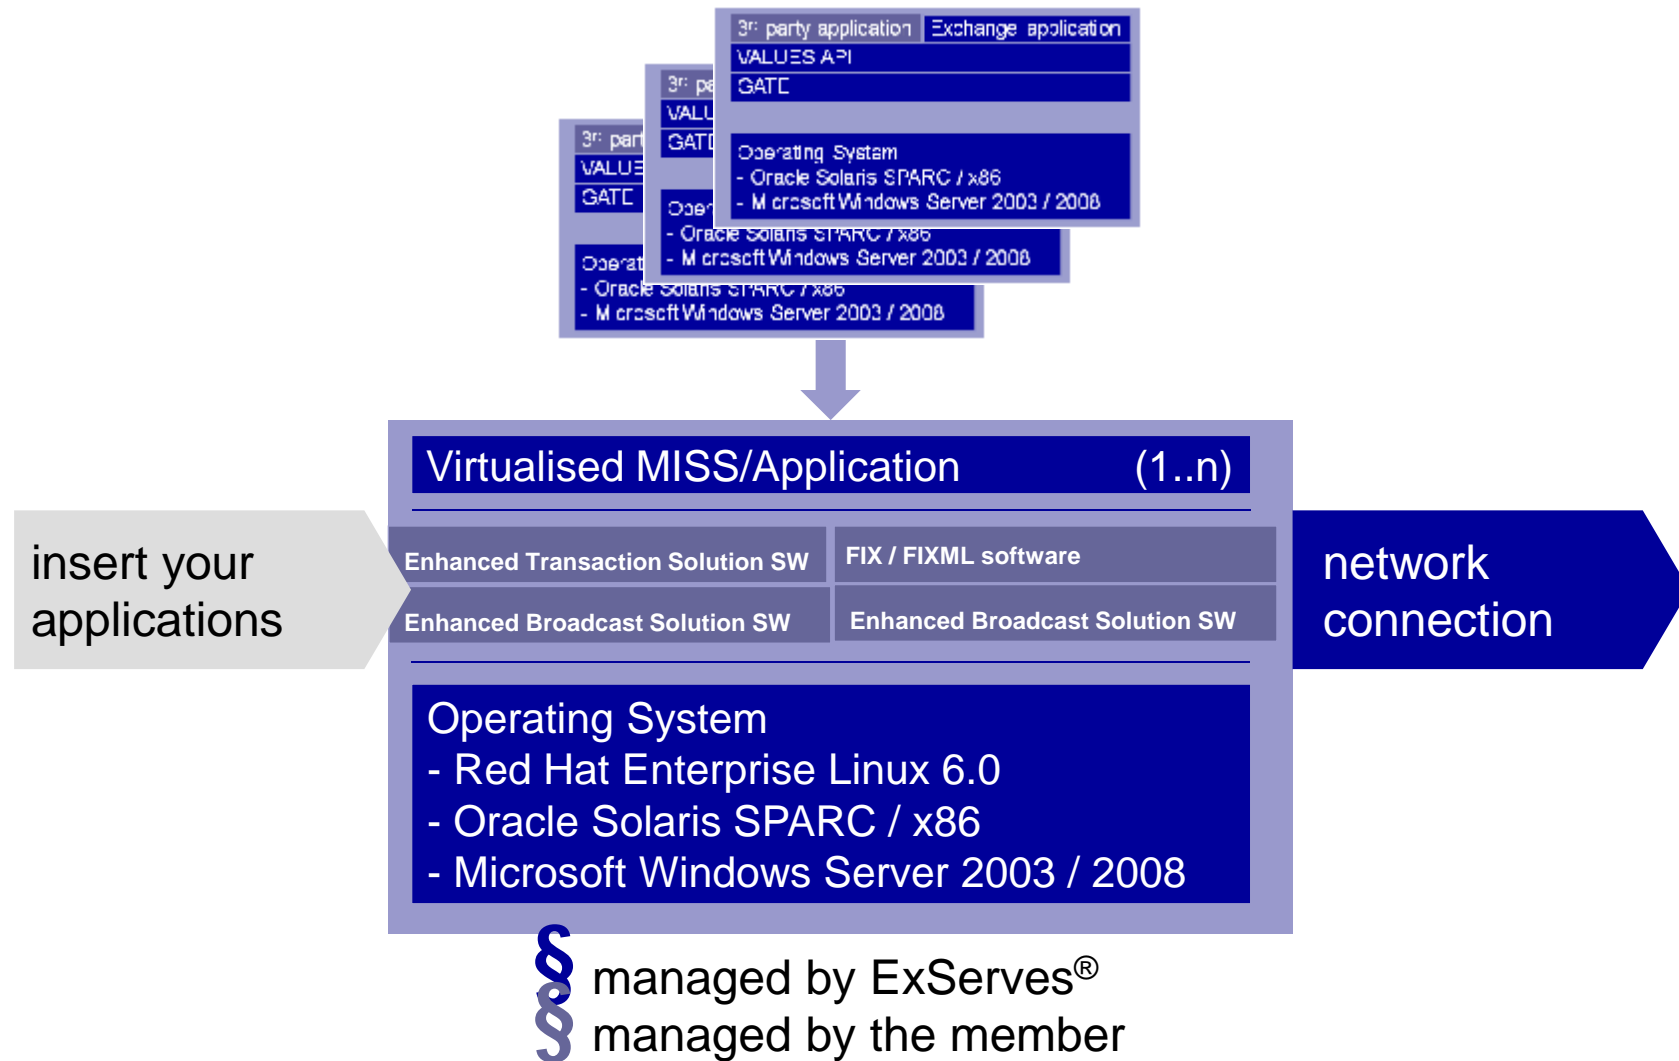

# ExServes® smart migration concept

## Getting ready for a new technical landscape

- n Your business model and strategy are changing, leading to new functional and technical requirements.
- n ExServes® is ready to provide creative technical solutions, ensuring a smooth transition and continuity of business in a changing technical landscape.

# ExServes® smart migration concept

# ExServes® smart migration concept

## Key benefits

- n ExServes® smart migration is a concept which allows a flexible migration from VALUES API to the new interfaces for trading, market data and clearing, while continuing to benefit from
  - n 24/5 pro-active server hardware and operating system monitoring
  - n server and network hardware maintenance and replacement service
  
- n allows you to run your own software on hardware sized according to your requirements and managed by ExServes®, installed in co-location or in a data centre of your choice

## ExServes® - What's new? Managed solutions in Asia

- n ExServes® management links are now available to the Asian financial community.
- n We can offer IP-based, continuously monitored and managed line connections between your offices in Hong Kong, Tokyo or Singapore and, for instance, our co-location data centre, via Deutsche Börse's low latency network.
- n Choose ExServes® and benefit from
  - n extremely high reliability
  - n quality of service
  - n quick and easy access
  - n attractive price
  - n 24/5 pro-active monitoring
