Activation for Trading in Foreign Currency Securities

Phone
+49-(0) 69-2 11-1 16 40

Fax
+49-(0) 69-2 11-1 16 41

Dear Sir or Madam,

Internet
deutsche-boerse.com

Subject to the decision of the relevant bodies, trading in foreign currency on the Frankfurter Wertpapierbörse (Frankfurt Stock Exchange) shall start on August 3, 2009. In a first step, we are planning to introduce ETFs/ETCs and Structured Products in foreign currency on Xetra Frankfurt and Xetra Frankfurt 2.

If a Trading Member does not wish to participate in trading of securities in foreign currency, there is no need to give notification to Frankfurt Stock Exchange or make technical adjustments; in this case, no action whatsoever is required.

If a Trading Member does wish to participate in trading of securities in foreign currency, it has to be activated for foreign currency trading by the Management Board of the Frankfurt Stock Exchange. In order to be activated, the Trading Member has to submit one of the attached applications "*Trading in foreign currency securities (one settlement account/multiple settlement accounts)*" to the Management Board and confirm by means of its signature and the signatures of its clearer and its settlement institute/clearing bank that it is able to settle products in foreign currency.

Further information about trading of securities in foreign currency and the necessary activation process is contained in the "*Information Memorandum Activation for Trading in Foreign Currency Securities*".

For your convenience, document package "*Information Memorandum and Application for Activation for Trading in Foreign Currency Securities*" is attached to this circular. It is also available for download from the website of the Deutsche Börse Group www.deutsche-boerse.com under

Management Board
