

# AlphaFlash® Treasury Feeds

## Machine-readable US and global treasury auction data

Deutsche Börse's low latency algo news feed, AlphaFlash®, provides machine-readable announcements and results from the most important treasury auctions worldwide. Algo traders, analysts, asset managers, hedge funds and risk managers operating in an automated, low latency trading environment can use the information to set algorithms to execute or halt trading. The information is made available in machine-readable format via multicast and TCP.

### Key Benefits

- Consistently faster and more economical than competitor products
- The feed makes use of the proprietary high speed AlphaFlash® network
- Designed for easy direct integration into trading algorithms
- Available in data centers across the globe

### US Treasury Feed

The AlphaFlash® US Treasury Feed contains information sourced from the New York Fed covering: Treasury Bills, TIPS & Cash Management Bills, Treasury Notes and Treasury Bonds.

### Global Treasury Feed

The AlphaFlash® Global Treasury Feed – introduced in September 2011 – provides information from the following countries and sources:

- Australia: Australian Office of Financial Management (AOFM)/The Reserve Bank of Australia (RBA)
- Austria: Austrian Federal Financing Agency (AFFA)
- Belgium: Belgian Debt Agency
- Canada: Bank of Canada

- Germany: Deutsche Bundesbank
- Italy: Department of Treasury (Dipartimento del Tesoro)
- New Zealand: New Zealand Debt Management Office (NZDMO)
- Poland: Ministry of Finance – Public Debt Department
- Russia: MICEX Market Data & Indices Department
- Sweden: Swedish National Debt Office (Riksgälden)
- Switzerland: Federal Department of Finance (FDF)
- United Kingdom: UK Debt Management Office (DMO)
- Further countries will be added

### Global Connectivity Options

Chicago, Secaucus (New Jersey), Washington DC, Sao Paulo, London, Frankfurt, Sydney, Tokyo and Singapore.

### 30-day Free Trial

AlphaFlash® is available for a 30-day free trial.
