Partnership for a trusted digital asset ecosystem

11 March 2019
Tokenized economy will redefine financial markets

Tokenization of assets

Broad spectrum of assets can be tokenized, e.g. financial instruments, industrial goods or real estate. By tokenizing traditional assets, a digital representative – digital asset – with smart features and real underlying value, is created.

Infrastructure for digital assets

Digital assets need a trusted, comprehensive, regulatory compliant infrastructure. This Infrastructure is the basis for the registration, safekeeping and transfer of digital assets.

Tokenized economy

Tokenization increases fungibility and flexibility. Assets are tradeable on a more granular basis and portfolios are more differentiated. Digital assets are the financial instruments of the future.
Potential of digital assets hindered by lack of trust in infrastructure

LACK OF TRUST BUILDING ELEMENTS:

- Undeveloped asset lifecycle management
- Low levels of liquidity and transparency
- Disjointed and inconsistent investor experience
- Limited integration between traditional money & digital assets
- No enterprise-grade custody solutions available
- Lack of institutional investor grade investment products
- Lack of experience to mitigate operational risk
- Fragmented regulatory landscape and lack of token standards
Partnership for an integrated digital assets ecosystem – trust, compliance, innovation

- **daura**
  - Integrated equity issuance solution

- **CUSTODIGIT**
  - Enterprise grade, fully compliant technical solution for custody

- **swisscom**
  - Trusted Distributed Ledger Technology infrastructure

- **DEUTSCHE BÖRSE GROUP**
  - Build, load and operate financial market infrastructure

- **SYGNUM**
  - Integrated banking services to securely issue, store, trade and manage digital assets

*Sygnum will offer banking services following the obtaining of a banking and securities dealer license from FINMA*
Core elements: issuance, market-place, banking services, custody, infrastructure

**TOKENIZATION / ISSUANCE**
- **daura**
- **swisscom**
- **DEUTSCHE BÖRSE GROUP**
- **MME**

Easy access to the OTC capital market for Swiss SMEs and startups. Digital share registry on a ledger.

**MARKET-PLACE**
- **DEUTSCHE BÖRSE GROUP**
- **SYGNUM**

**TRUSTED INFRASTRUCTURE**
- Operational platform
- Consensus as a Service
- Cyber security
- Privacy layer

*Sygnum will offer banking services following the obtaining of a banking and securities dealer license from FINMA.*
Vision for our trusted ecosystem

EXPERIENCE + INNOVATION
Partnership combines longstanding experience in building & operating infrastructure – and the Distributed Ledger Technology expertise, vision and agility to lead innovation in regulated environments

INTEGRATED OFFERING
Disruptive potential of Distributed Ledger Technologies is driven by ecosystem of trusted, regulated providers with compelling integrated offering for institutional clients

INDUSTRY WIDE BENEFITS
Innovative approach delivers tangible benefits for all industry participants, including enhanced operational simplicity and efficiency, transparency, compliance, and security

FUTURE FINANCE
trusted ecosystem realising the full potential of digital assets
Sygnum is a Switzerland and Singapore based financial technology company in the regulatory process to obtain a Swiss banking and securities dealer license.

Sygnum empowers financial services for the digital asset economy by providing an integrated solution to securely issue, store, trade and manage digital assets.

The company was founded by an experienced, interdisciplinary team of banking, investment and technology experts, and is backed by a distinguished group of individuals and institutions.

Swisscom, Switzerland’s leading ICT company and one of its leading IT companies, is headquartered in Ittigen, Berne.

About 20,000 employees generated sales of CHF 11.7 billion in 2018.

Swisscom supports regulated financial institutions in digitization. One of the central fields are digital asset services. The provider aims to build a whole ecosystem of blockchain technology.

Deutsche Börse Group’s products and services cover the entire value chain in the financial services sector. The company organises markets characterised by integrity, transparency and safety.

With more than 5,000 employees, Deutsche Börse has its headquarters in the financial center of Frankfurt/Rhine-Main, as well as a strong global presence in more than 20 locations.

Deutsche Börse Group, with its services and systems, ensures the functioning of these markets according to clear rules and strict supervision, creating a level playing field for all participants – globally.
