“Roadmap 2020”

London, 30 May 2018

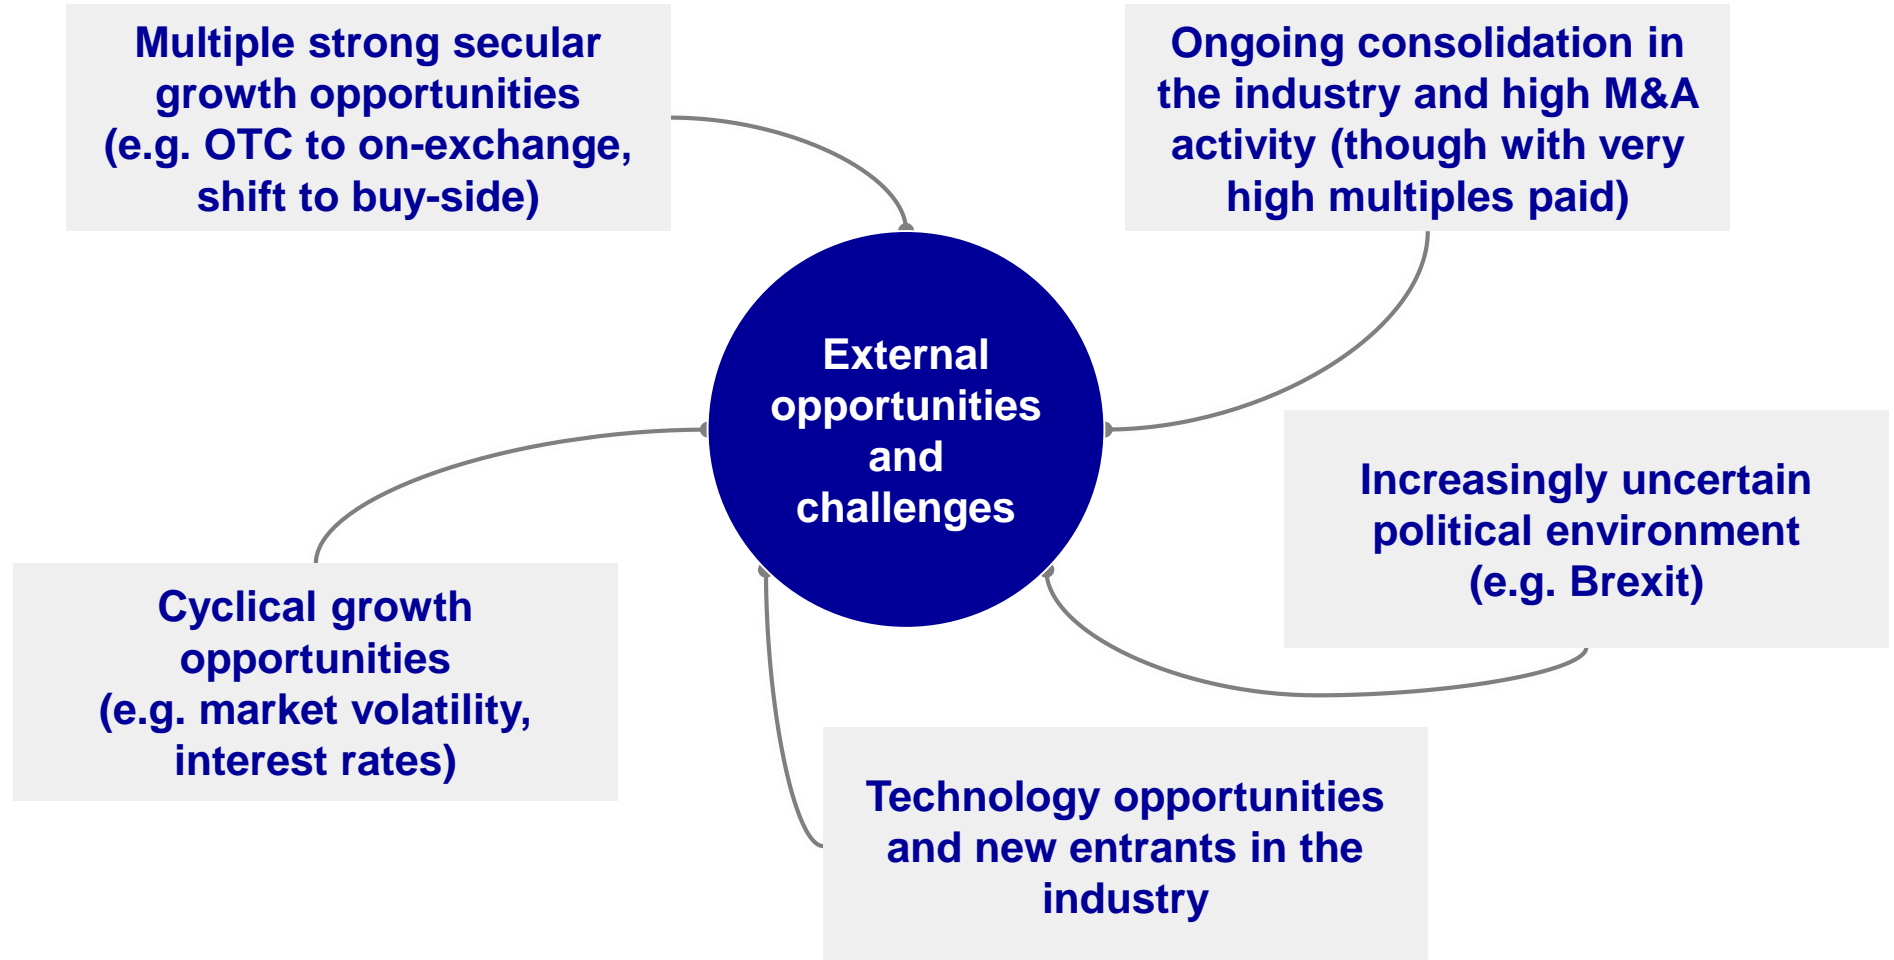

Deutsche Börse equity story

- **Leading European** capital markets **infrastructure provider** with **global growth ambitions**
- **Nine business segments** that cover the **full capital markets value chain** including:
 - Eurex, the largest European derivatives exchange
 - Clearstream, a leading post-trading services provider
 - Promising new businesses: EEX (commodities), 360T (foreign exchange) , and IFS (investment fund services)
- Deutsche Börse follows a **three pillar growth strategy**:
 - Systematically **execute** secular and cyclical **growth opportunities**, capitalizing on **key industry trends, political developments**, and **new client needs**
 - Pursue a **programmatic M&A** agenda in **five growth areas with a focused and disciplined approach**
 - Invest in **four key technologies to tap into new revenue opportunities and further increase the operating efficiency**
- The company will **efficiently manage operating cost to ensure scalability of the business** model and will reduce its **structural** cost base to **reinvest** into **growth** and **technology**
- **To ensure a successful execution**, Deutsche Börse will streamline the organisation and strengthen the consequence management
- **Dividend policy confirmed** with payout between 40 to 60 per cent of net profit

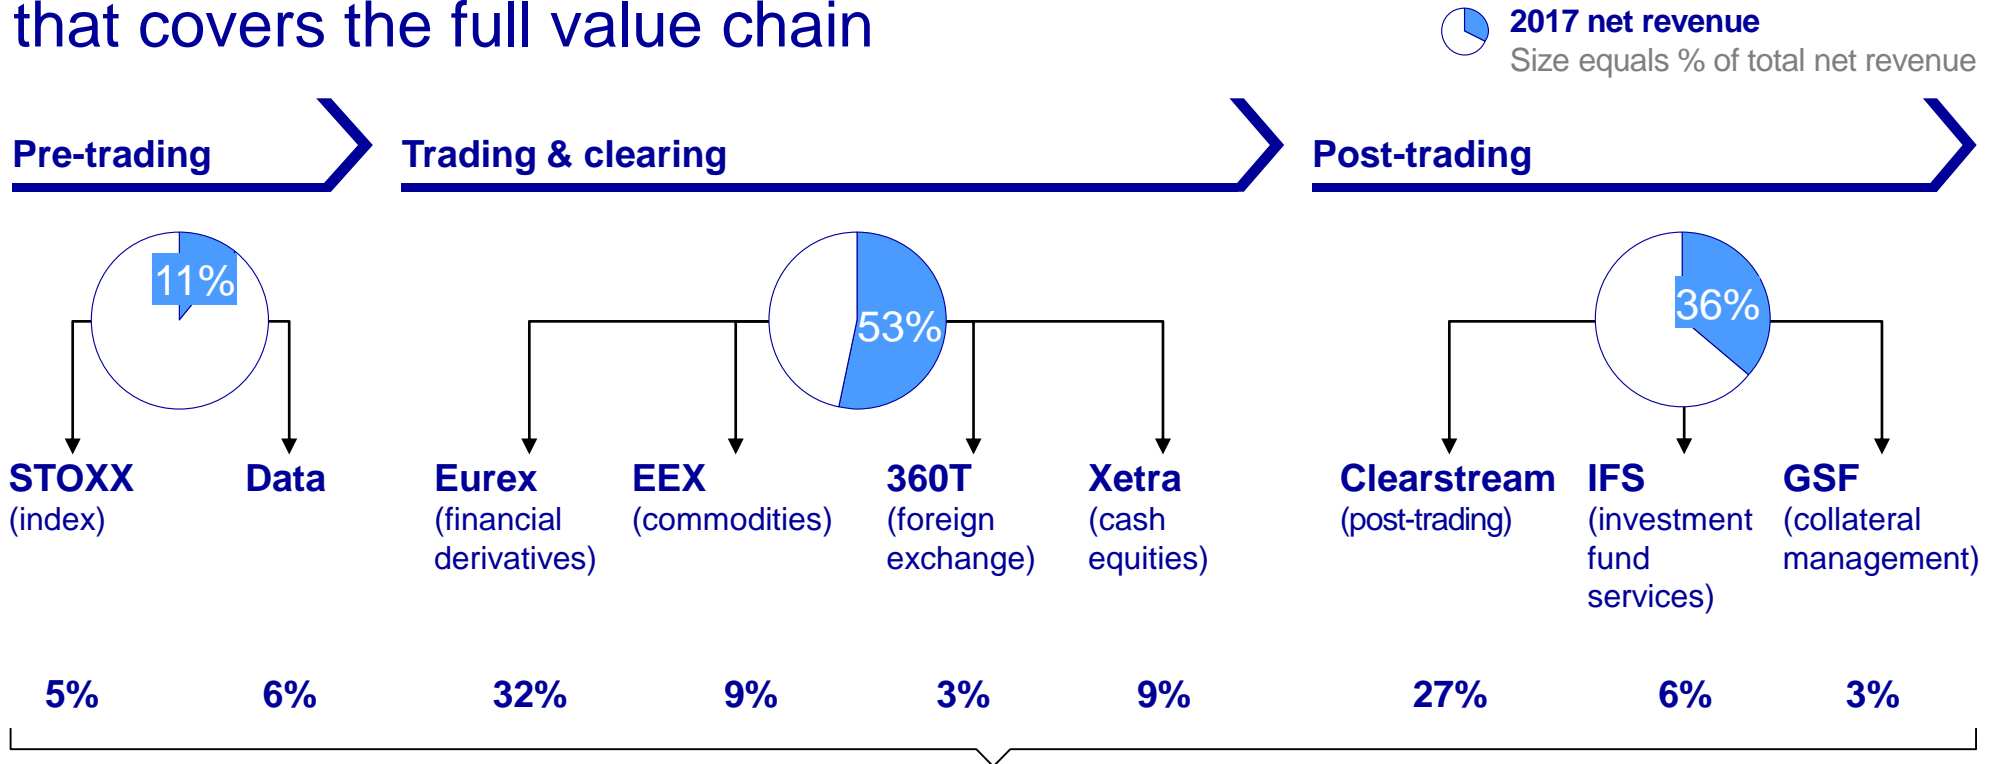

Agenda

- **Point of departure**
- Roadmap 2020
- Mid-term financial outlook
- Business segment deep dive
- Wrap-up and Q&A

Deutsche Börse operates in an environment with high dynamics, but very attractive opportunities

Deutsche Börse has a strong business portfolio that covers the full value chain

- #4 exchange organisation globally by market capitalisation
- Nine diversified business segments covering the full capital markets infrastructure value chain
- €2.5 billion net revenue with 58% adjusted EBITDA margin in 2017

Solid financials proving the scalability of the business model

Net revenue 2014–2017 (€bn)

	CAGR

Secular and cyclical growth opportunities along the value chain

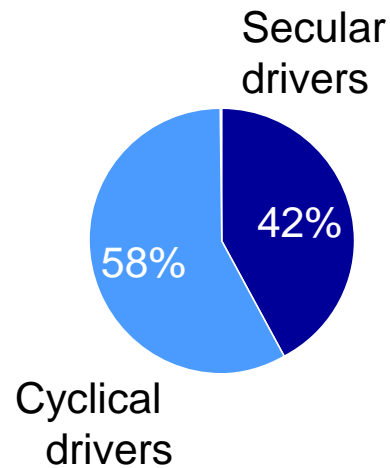

Investor survey in Q1/2018 yielded positive feedback

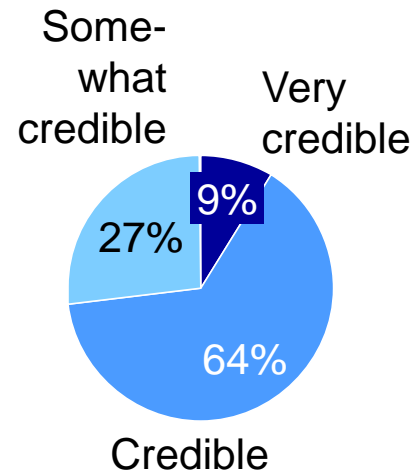

Deutsche Börse primarily seen as growth stock ...

... where cyclical growth is slightly more important

Deutsche Börse with a credible strategy ...

... and a satisfying high dividend policy

Deutsche Börse is in a position of strength, with specific areas to be improved

Areas of strength ...

- ⊕ #1 European player
- ⊕ Technology leadership
- ⊕ Diversified portfolio covering entire value chain
- ⊕ Robust business model in times of cyclical headwinds
- ⊕ Solid secular growth

... and weakness

- ⊖ Valuation multiple disadvantage
- ⊖ Slightly more cyclically driven business
- ⊖ White spots in some areas (fixed income, buy-side)
- ⊖ Sub-scale businesses (commodities, foreign exchange)

Execution excellence will be the key to our success

Three priorities for the new CEO ...

1 Grow the company

2 Maintain technology leadership

3 Demonstrate execution discipline

... to create value for the Group

Build scale in sub-scale business segments

Reduce valuation multiple discount

We want to stay a leading technology provider by focusing on four key technologies ...

Four transformational technology trends

DLT / blockchain	Distributed ledger technology / blockchain creates new market structures and allows adding products onto existing structures
Big data / Advanced Analytics	Advanced analytics is both a revenue driver adding value to data, and an efficiency lever
Cloud	Cloud and exposing of services via APIs is enhancing scalability and opening new platform business options
Robotics / automation / AI	Artificial intelligence and robotic process automation are key efficiency drivers for operations-heavy tasks

How Deutsche Börse will capitalise

Create markets/ drive revenue	Increase efficiency	Enhance client service
----------------------------------	------------------------	---------------------------

 Strong match  Moderate match

... and are currently growing our capabilities in all four technologies

DLT / blockchain

Entering into phase II (from use cases to broader based application)

Big data / Advanced Analytics

Systematic monetisation of existing data across the Group

Cloud

New Executive Board member with extensive experience

Robotics automation / AI

Already identified potential to increase efficiency and capture savings in the double digit million Euro range

We will structurally improve our cost base to fund our growth and technology investments through two mechanisms

Allowed cost increase

Allowed increase at given **scalability**:

At 10 per cent net revenue growth operating cost can grow up to 5 per cent

Shift in cost base

Shift by structurally improving productivity:

- Reduction of cost by €100 million by end of 2020 through reducing work force by ~350 FTE, thereof 50 managers, and reducing operating cost
- Re-investing in growth

Deutsche Börse will strengthen its execution discipline through four main levers

Description

1**Consequent realisation of secular growth**

- Strong business segment heads established
 - Business segment heads with full P&L responsibility
-

2**New executive board members**

- Clearer responsibilities
 - Stronger business focus
 - Stronger technology focus
-

3**Professionalisation of key processes**

- Upgrade M&A capabilities
 - Systematic development of new technologies
 - Tighter steering
-

4**Consequence management**

- Strict consequence management including e.g.
 - Investment allowance
 - Personal compensation cuts

Agenda

- Point of departure
- Roadmap 2020
- **Mid-term financial outlook**
- Business segment deep dive
- Wrap-up and Q&A

Mid-term financial targets are confirmed and made more specific with a clear ambition to achieve secular growth

Growth aspirations until 2020

- Organic/secular net revenue growth of >5% CAGR
- Positive cyclical effects every year
- Net profit 10-15% CAGR

Capital management

- Dividend policy: ~40% to 60% of net profit
- Rating: AA (gross debt/EBITDA <1.5)

Cost management

Scalable business model

- Net revenue: +5% → Costs: 0%
- Net revenue: +10% → Costs: max. +5%

Including €100 million structural cost reduction by end of 2020 to finance growth

In past years, Deutsche Börse business model has proven to be scalable – supported by active cost management in 2016/17

Net revenue growth 2014–2017 (€m)

Net profit growth (adjusted) 2014–2017 (€m)

¹ Excluding International Securities Exchange (ISE)

Cyclical growth opportunities

	Description	Volatility	Interest rates	Net revenue impact 2020E (€m)
Eurex	a Increase of market volatility resulting in higher index derivatives activity	✓		50-100
	b Expectation on future interest rates drives fixed income activity		✓	50-100
Clear-stream	c Net interest income directly correlated to ECB / US Fed rates		✓	50-150
	d Higher net issuance of bonds if interest rates increase		✓	50-100

Eurex well positioned to capture cyclical effects

a Index derivatives gross revenue and volatility development

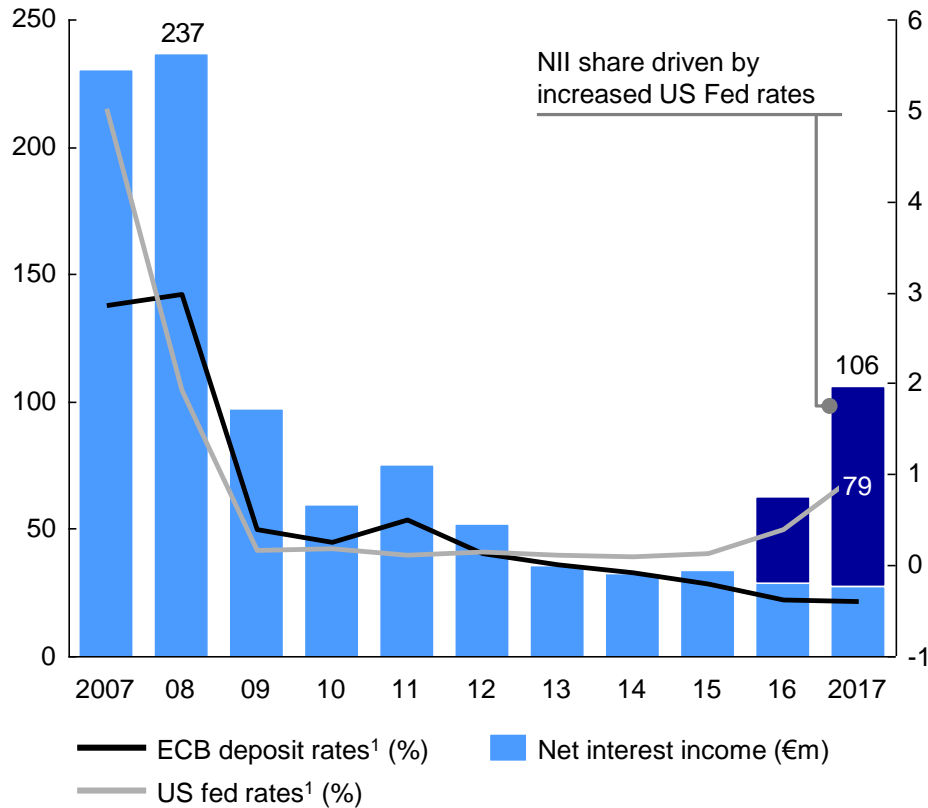

b Fixed income derivatives gross revenue and government bond yield development

Clearstream well positioned to capture cyclical effects

c Net interest income (NII) and central bank rates development

d Debt issuance activity and ECB deposit rates

Structural performance improvement to scale business model

Cost development

Key levers for structural cost savings split between staff and non-staff cost

Cost distribution 2017

100% = €1,197 million

Savings targets

€50m

€50m

Key levers to reduce cost base

- Management delayering
 - Process automation and digitisation (Robotics / AI)
 - Nearshoring
 - Position cuts
-
- IT simplification and legacy replacements
 - Enhanced IT sourcing (offshoring)
 - Procurement optimisation
 - Spend reductions across all cost categories

Savings of €100 million will be invested into growth and new technologies

Cost savings (€m)

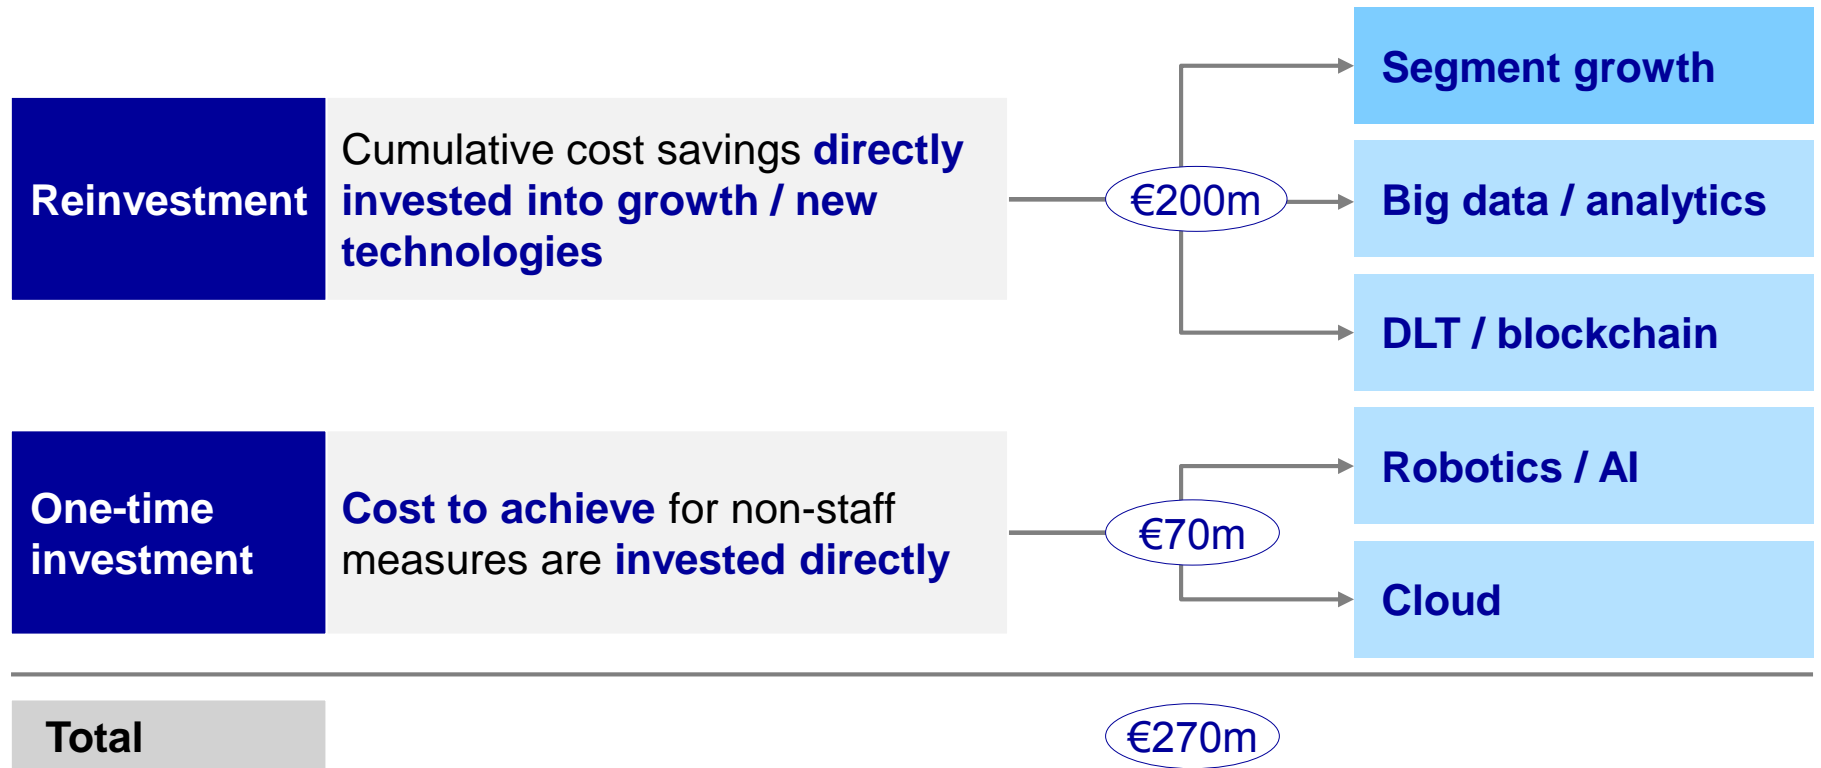

€100 million creates flexibility – if net revenue growth allows, savings will be **reinvested**

Cost to achieve (€m)

To achieve structural improvements a **one-time investment** of ~**€200 million** will be made

Cost savings and one-time investments for non-staff measures are reinvested into growth and efficiency

About 2/3 invested into growth, 1/3 into efficiency

Balanced approach: capital allocation between growth and dividend distribution – confirmation of policy going forward

Rating

- Strong AA credit rating mainly because of post-trading business
- Gross debt to EBITDA required to be <1.5x

Dividend policy

- Payout between 40% to 60% of net profit
- Mid-term payout target ~50%

Excess cash

- Use includes M&A and potentially share buy-backs

Eurex' global competitive position – leading venue to trade and clear European derivatives

Business overview and attractions

Markets & products

- Leading venue to trade Euro-Yield-Curve with 70% market share in Euro-denominated interest rate derivatives
- Leading venue to trade international benchmark indices with 65% market share in European equity and index derivatives
- Strong innovation track record with new products contributing more than 10 per cent of net revenue in 2017

Clearing & risk management

- Innovative portfolio margining under single framework with unmatched capital efficiencies across listed derivatives, OTC and repo
- Unique collateral segregation, margin financing and repo solutions to facilitate direct buy-side access
- Unmatched member base under single risk framework: 61 members in OTC, 73 in listed derivatives and 137 in repo; more than 130 registered customers in OTC and 24 in listed derivatives

Technology & distribution

- Leading next generation on-book data and proximity services, complementary price discovery and off-book trading models
- 370 member firms with more than 7100 traders in 33 countries; more than 70% of trading volumes from outside Eurozone

Net revenue breakdown Q1/2018

100% = €237 million

Strategic imperative

Increase market share vs OTC

Eurex' secular growth drivers – opportunities from transformational shifts in market demands

Secular growth drivers

Passive investment strategies

Shift to passive strategies accelerates buy-side demand for index derivatives; demand for international benchmarks across time-zones

- ➔ Advanced starting position in fastest growing global MSCI index family; outperformed global competitors

Futurisation of OTC derivatives

Balance sheet and cost pressure drive buy- and sell-side demand for listed derivatives and futurisation of OTC derivatives

- ➔ First exchange to offer total return futures (€16 billion notional open interest; 20–30% of OTC swap market migrated)

CCP clearing of OTC derivatives

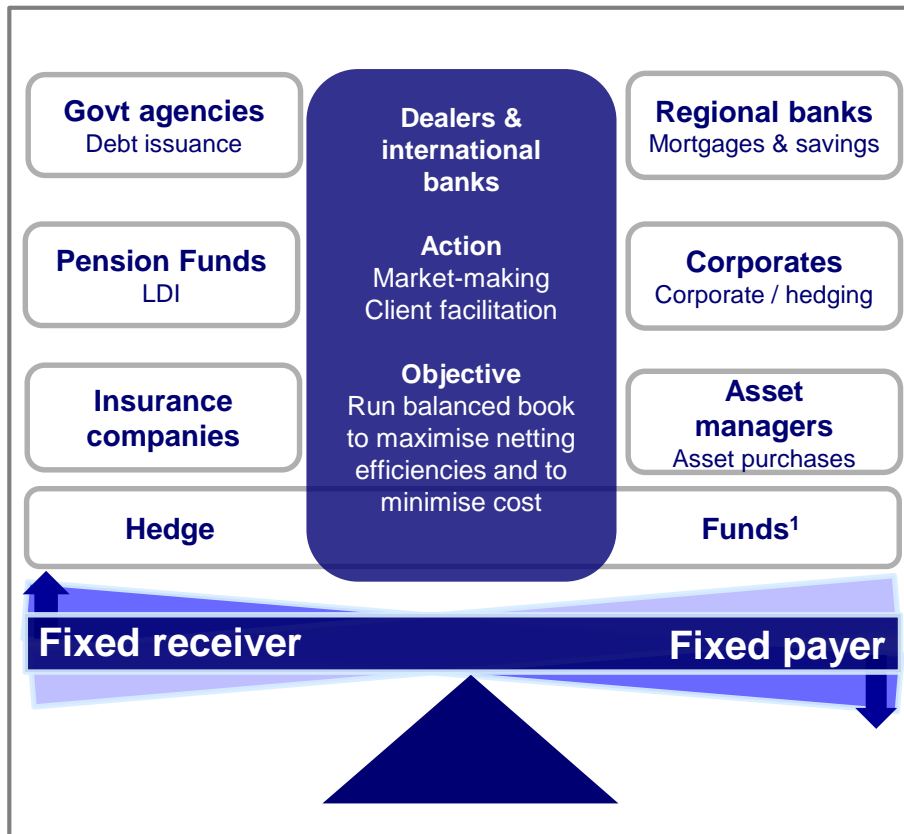

Market demand for liquid, EU-based alternative for the clearing of OTC derivatives and repo markets in wake of Brexit

Net revenue guidance (€m)

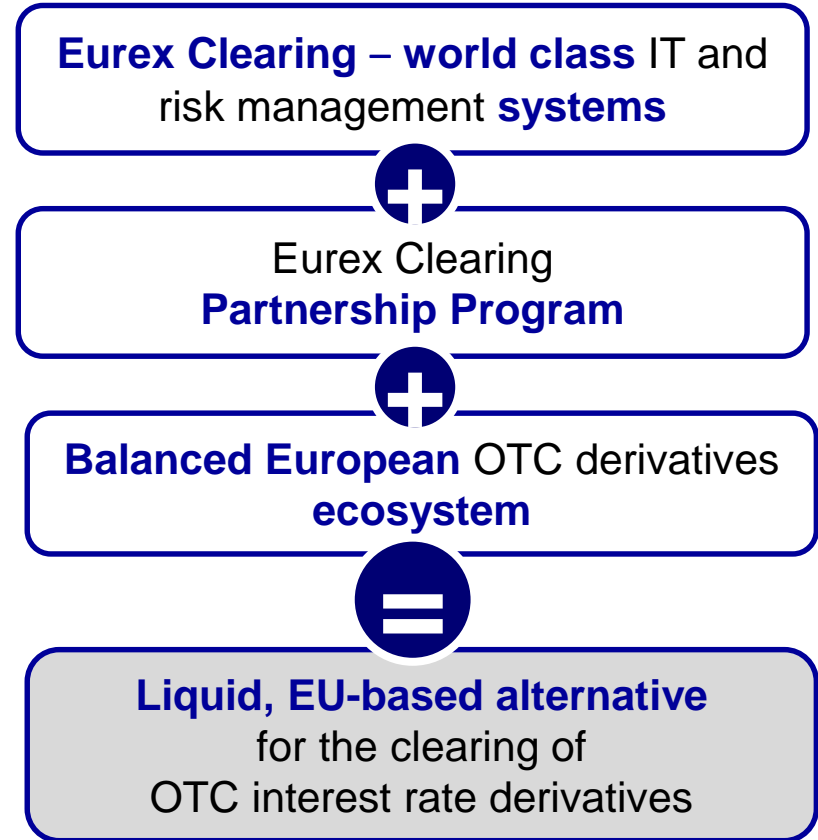

Eurex Clearing – industry platform for an EU-based liquid alternative for interest rate derivatives

EU OTC derivatives ecosystem

Note: Some client types can operate on either side of the market

¹ Primarily domiciled outside EU, but likely to be attracted by natural liquidity pool within EU and margin efficiencies across OTC and ETD

Eurex Clearing – significant progress in establishing alternative liquidity pool for OTC interest rate derivatives

Secular growth drivers

Stepwise approach to build Euro OTC interest rate derivatives ecosystem:

- Sign-up broad range of banks to participate in the Eurex Clearing Partnership Program (27 participants as at May 2018)
- Win share in dealer-to-dealer business to establish initial liquidity
- Connect buy-side execution platforms and facilitate attractive and fair execution prices quoted to the buy-side by large dealers
- Increase client base to hedge funds, asset managers insurance firms and pension funds based on superior value proposition (collateral, margin and capital efficiencies)
- Foster competition and innovation in cross CCP risk and capital management

- Focus on **high-potential asset managers** globally
- **Growth in regions outside of Europe** – acceleration of growth rates in US and APAC

Deutsche Börse FX (based on 360T and Eurex offerings)

- **Futurisation of FX:** shift from pure OTC FX towards futurisation; Deutsche Börse Group to launch new listed FX offering
- **OTC FX and XCCY clearing:** introducing new FX / XCCY clearing offering during 2018 with solid market potential

Net revenue guidance (€m)

Xetra (cash equities) – continuous revenue delivery via capturing of cyclical effects and buildout of pre-IPO ecosystem / platform updates

Business overview and attractions

- **Reference market** for liquid German equities and # 1 in European ETF trading, strong retail position in Germany
- **Strong growth** of market share in **DAX®** (from below 60 per cent to 69 per cent in Q1/2018) due to technology refresh, incentive programme and new customers
- **“Face” of Deutsche Börse** – shapes company reputation and perception in public; starting point of Group value chain

Initiatives:

- **Renewed technology** stack to leading next-generation platform (T7® trading system)
- **Enhanced pricing** and incentive mechanisms (liquidity provider programme)
- **New trading functionality** (Xetra EnLight)
- Developed **pre-IPO ecosystem**: IPO pipeline filled by Deutsche Börse Venture Network exits

Net revenue breakdown Q1/2018

100% = €62 million

Strategic imperative

Starting point of Group value chain / capture cyclical effects / increase market share vs OTC

Xetra (cash equities) – secular growth drivers

Secular growth drivers

- **Attract OTC trading volumes to Xetra® order books** (leverage MiFID II regulation), focus on German blue chips and ETFs
- Benefits of **T7® technology** platform, e.g. for gaining new customers
- **Liquidity provider programme extension** to further segments
- Primary market activity: **IPO business** and related order book volumes
- Further development of **pre-IPO ecosystem** (Deutsche Börse Venture Network and SME initiative), expand “funnel” for IPOs

Net revenue guidance (€m)
