

Cardiff Business School

At Deutsche Börse Group we believe that the world's most ambitious students are essential to the maintenance of our ambition as the world's leading financial markets organiser.

By working together with the world's leading educational institutions, we aim to nurture fresh, innovative and insightful thinking. Eurex Group's cooperation with the Cardiff Business School is an example of this.

As sponsor of the Trading Simulation Room, we enable students to supplement their classroom-based studies with a realistic trading environment. Furthermore, the university has implemented learning modules whereby students utilise the Trading Simulation Room to learn about financial markets concepts and instruments.

Coupled with guest lectures and various other events on campus, which provide an opportunity for students to interact with our experts in various fields, this initiative provides life-long learning opportunities to students and also to our employees.

- Employees
- Environment
- Economy
- Society

Role of Deutsche Börse Group

Eurex sponsors the Trading Simulation Room and hosts events that provide extra-curricular learning opportunities.

Project start

2010

Project partner

Cardiff Business School

<http://www.business.cardiff.ac.uk>
